

**REMARKS**

Applicant has modified the independent claims to further specify the sources of the underlying data and how the data is transferred to the data stream. Specifically, Applicant has modified the independent claims to further specify that a database is located remote from a user receives programming information from a variety of sources and the database provides active pages of data for a user. The database is repeatedly scanned in order to identify data for the data stream. Applicant submits that the prior art references of record provide no teaching or suggestion regarding this advance in the art.

Respectfully submitted,

Date: 7/12/04

  
Robert J. Depke

(Reg. #37,607)
